Lab Essentials for the Life Science Industry

Bioreactor HABITAT for cell culture or fermentation

The ergonomic and reliable bioreactor that facilitates and optimises your laboratory processes, whether for cell culture, algae production or bacterial fermentation. Several reactor sizes available and sensors available.

Pipettes IKA PETTE and tips

Single-channel and multi-channel pipettes for precise handling of your liquids at a very attractive price. These pipettes come with interchangeable handles for ergonomic use.

Incubator INC 125

The incubator, with a removable shaking platform, features high temperature stability and uniform shaking motion, making it ideal for microbiology applications.

ULTRA-TURRAX® Tube Drive P

A versatile equipment for shaking, dispersing, grinding or homogenising as required. Sterile, single-use tubes handle your samples safely.

Thermoshaker MATRIX

A shaker-stirrer that lets you heat and cool with high precision according to your needs for small-volume samples (up to 50 mL).

Magnetic Stirrer IKA TWISTER

The universal and compact stirrer that can be transformed into a vortex agitator, orbital agitator or even a multi-position agitator, depending on the accessories.
